Neothorin [2-(1,8-dihydroxy-3,6-disulfo-7-naph-
thylazo)benzene-arsonic acid] forms a violet com-
pound with Th, and this color changes to red by addi-
tion of F^- . By the use of this color change with F^- as
little as 0.01 ppm can be determined. F^- should be
separated from disturbing ions such as PO_4^{---} , Al,
and Fe by distillation. (Author)
